November's Talk: Brighton Electricity Supply, by John Narborough.

This promises to be a most interesting talk by John, who has visited us and entertained our members on many occasions recently.

His last talk was about how electricity gets from the generator into the home; we saw some wonderful photographs of wooden poles on fire, and transformers which had suffered a near hit by lightning, and learnt that pylons were really called transmission towers and they had been specially designed to look like jolly metal giants running across fields for minimum visual impact.

John 'works' at the Amberley Working Museum, and the local electricity board, therefore has more knowledge about this subject than anybody.

It seems that the talk has been updated so if you have seen it before at another club then

that is not a valid excuse to miss this one!

Next events:

Saturday 12th November is the 160m Club Calls Contest.

Time 2000 - 2300 UTC

Freqs: 1870-1990 kHz

Mode: SSB

Exchange: RS + Serial No+ other data, where other data is

Club Member of Horsham Amateur Radio Club.

Please forward logs to G3ZBU@hotmail.com for scoring and forwarding to the RSGB. This is our chance to win back the G4IQM Memorial Trophy, which is awarded to the club with the highest score from 5 members.

This is normally won by Cheltenham. We won it a

couple of years ago, then Hadleywood, and most recently, Cheltenham again. We only lost by about 10%, so it is not difficult to achieve a win this time. Worthing put on a great effort with about 15

members active.

Please remember that power is 32 Watts at the antenna for the SSB section of 160m, and take special care to log portable stations as /P.

“RSGB Advanced Course

The Club will be running an Advanced Course commencing on 7th November with a view to candidates taking the exam on Wednesday 15th March.

The course will be held at Collyer’s College in Horsham on a mixture of Monday and

Tuesday evenings from 19:30 to 21:30. If you are interested please contact Andrew Vine by either phone or email on 01483 272456 / m0gjh@dsl.pipex.com.”

Many thanks. Andrew
